

International Hands-on Course for Autotransplantation of Teeth

April 3, 4, 2019

Nagoya, Japan

Dear colleagues,

It is my great pleasure to announce that Dr. Mitsuhiro Tsukiboshi has decided to hold the 3rd international hands-on course for autotransplantation of teeth (ATT) in Nagoya, Japan.

The popularity, interest and importance of ATT are increasing year by year but ATT has not been taught comprehensively everywhere. Every time his visiting foreign countries, the international hands-on course of ATT was eagerly requested.

Nagoya is the third city in Japan, situated 2 hours west of Tokyo and 35 minutes from Kyoto, the world famous historic place by bullet train. Mt. Fuji is located not so far. The venue is Dr. Tsukiboshi's dental office seen above, which is located 10 minutes from the Nagoya Rail Station and 45 minutes from the Nagoya International Airport.

The program will consist of one day's lecture and one day's hands-on: Wound healing, techniques for success, indications including intentional replant will be discussed with numerous clinical cases. Live operation will be prepared. Dr. Tsukiboshi is very sure that the participants can share not only precious information of ATT but also wonderful memories of Japan.

See you in Nagoya!

Mitsuhiro Tsukiboshi, DDS, PhD. The past president of IADT.

International Hands-on Course for Autotransplantation of Teeth
